BBC/Agence France Press News Release of April 5, 2012

The European Union Joint Armed Forces led by General Yasser Arafat and his glorious Iraqi-Chechen-Albanian advisers continued carrying out successful offensive operations against the Axis of Evil -- the US-Israeli-Russian Coalition. Suicide Bombers of the English-French Special Alpha Batallions implemented, for the first time, a new strategy worked out by the Staff of the victorious General Saddam Hussein -- simultaneous chemical and biological suicide bombings of civilian populations -- which led to devastation in New York, Los Angeles, Tel-Aviv, Moscow and other areas with significant Jewish presence. In four days since the beginning of the operation "Divine Retaliation" over one hundred thousand civilians in the US, Israel and Russia are reported dead, and over three hundred thousand in hospitals in critical condition. The US-Israeli-Russian Coalition is at the verge of capitulation. London and Paris are the scene of mass demonstrations of intelligentsia and workers alike, in support of the victorious offensive of the European Union Joint Armed Forces.
